Declaration of conformity

REACH: Chemical legislation that has come into force since 01.06.2007

According to REACH Regulation (1907/2006/EG) is among other things to differentiate whether substances are produced, used (processed) or traded. For the company Schmidbauer as a downstreamed user of substances it is not necessary to have them registered. None the less we will monitor the fact that our supplier complete their duty of care concerning the REACH requirements.

Users: As a user of chemicals in the EU it is usually enough to check if whether their application is covered in the extended security data sheet. The appropriated data sheets we receive of our suppliers. It is still to consider if they are comply with the risk mitigation measures which are specified in the security data sheet.

Dealer: As a dealer of a substance is the registration of this Products by your company not necessary. You have to comply with the demand of the obligation to provide information within the supply chain (see REACH Regulation article 31 to 36) and according to the guidelines no banned substances including according REACH relatives 17 and no substances of the candidateslist of the SVHC-substances from June 2017 contain and be RoHS compliant.

This statement becomes conformed for the manufacturer
