Aluminium transformer

a perfect alternative to copper transformer

+ high efficiency factor with standard materials:

from 60kVA over 98,5% from 200kVA over 99,0%

- + **reduction of 45 % of the weight** compare to standard transformers (lower freight costs)
- + cost reduction because there is no extra copper addition
- + power range up to 2.5 MVA
- + attractive, efficiency-oriented and market-driven prices
- + water cooled version
- + a version with active air cooling is possible

lighter

more efficient

reduced price

If you have any further questions don't hesitate to contact us.

Aluminium transformer

lighter

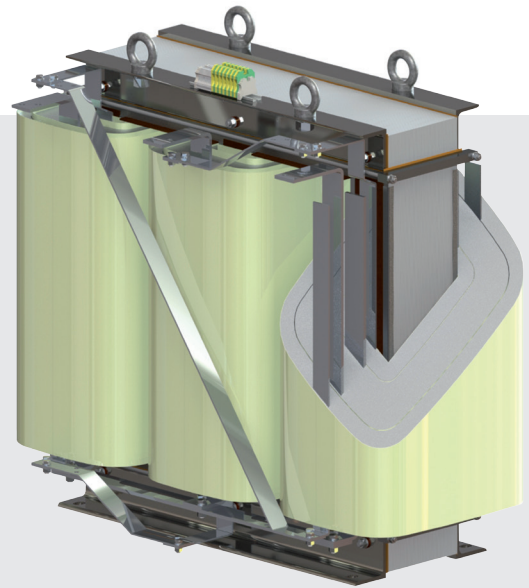

more efficient

reduced price

- + optimal use of the required materials
- + available as autotransformers and isolating transformers
- + several voltage level are available

- + possible vector groups like Dyn5, Dyn11, YNyn0, Yd5, Dd0
- + short-circuit voltage can be adjusted on demand
- + class of protection: protective earthing or protective isolated
- + degree of protection from IP00 to IP66 possible

If you have any further questions don't hesitate to contact us.
